

## Lifetime guarantee *thermoscript* F 5041

### Image durability:

We guarantee an image durability of **5 years** on *thermoscript* F 5041, if handled according to the following instructions before and after printing.

### Storage conditions:

As with office paper, *thermoscript* F 5041 should be stored indoor, at temperatures between 18°C and 24°C and with a relative humidity of 40% to 60%. Longer term storage at temperatures over 40°C or over 60% relative humidity can lead to a reduction in image contrast.

### Handling conditions:

Direct sunlight, fluorescent and similar UV light sources should be avoided.

As the contrast of the printed image can be reduced depending on the duration of contact, *thermoscript* F 5041 should not come into contact with:

1. Carbon and carbonless forms.
2. Chart papers or adhesives containing tributyl phosphate, dibutyl phosphate or other organic solvents.
3. Envelopes or folders composed of plastics containing plasticizers.  
Office materials suppliers also offer products free of plasticizers.
4. Solvents or solvent-containing products which include alcohol or other substances from this chemical group.
